

[30/09/2026]

Mixed references.

Mixed reference means: Row or column one part fixed change it

	A	B	C	D	E	F
1	1	2	3	4	5	6
2	2	$=\$A2*B\1 = 4	6	8	10	12
3	3	6	9	12	15	18
4	4	8	12	16	20	24

Formula is
 $=\$A2*B\1

\$ symbol is F4.
 click the F4.

ROMAN

Some data is align right side numeric
 for ROMAN is left side align there is text.
 how change the numeric for roman.

$= \text{ROMAN}(\text{number}, [\text{form}])$

Used it $= \text{ROMAN}(N2)$ this formula.

Result is = 4-IV, 6 VI. like that.

ARABIC

ROMAN $\rightarrow I, II, III, IV, V$

ARABIC $\rightarrow 1, 2, 3, 4, 5$

$= \text{ARABIC}(C2)$

REPT

= REPT (text, number_times)

4 → 4444

the values of 4 repeat the 4 time (example
4 → 4444 times)

The Rept same values.

If you have 4 and want to repeat it 4 times
to get 4444.

If you want b repeated 6 time → =REPT(A1, 6)
→ bbbbbb.

If you have 4 you want to 4 stars
how it figures out (Ex: =REPT(W\$1, V2)
Select Columns and Value rows Click the
Enter) result is 4 → ****.

Find the Sqrt of values. Square root
↳ = SQRT (number)

Select the values put on the Formula (like
Example = SQRT(x2)

Multiple the data value by -1

A2 → 16 → -16

A3 → 20 → -20

(Example = A2 * -1)

How can be change positive

= ABS (A2) A2 -16 → 16

$$\text{ROUND} = \text{ROUND}(\text{number}, \text{num_digits})$$

ROUND is used to round a number to specific number of decimal places

$$A2 \rightarrow 4.8314 (= \text{ROUND}(A2, 0)) = 5$$

$$\text{ROUND UP} = \text{ROUND UP}(\text{number}, \text{num_digits})$$

$$A8 \text{ Formula:} = \text{ROUND UP}(A1, 2)$$

Example:

$$A1 = 12.3456$$

$$= \text{ROUND UP}(A1, 2) \rightarrow 12.35$$

$$= \text{ROUND UP}(A1, 0) \rightarrow 13$$

ROUNDUP is used to round a number up to specific number of digits.

$$\text{Formula:} = \text{ROUND DOWN}(A2, 0)$$

Example:

$$A1 = 4.8319$$

$$\text{ROUNDDOWN}(A2, 0) \rightarrow 4$$

ROUNDDOWN is used to rounding a number down specific number of decimal places.

$$\text{Power} = \text{power}(I2, J2)$$

There is a data

Data	power
4	2
6	3
2	3

The select the two columns put on the Formula (=power(number, power) number is 4 power is 2 Click the enter 16 result.

Operation -

First select the First name and last name

Operation

FN	LN
Archana	kumar

(= D22 & " " & E22)

result: Archana.
